|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                   | <del></del>                                                                            |  |  |  |  |

Application/Control Number: 10/721,648

Art Unit: 2878

#### DETAILED ACTION

#### Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: It does not identify the city and either <u>state or foreign country</u> of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

### **Drawings**

- 2. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- The drawings are also objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 15 (pg. 3, line 16). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being

Application/Control Number: 10/721,648 Page 3

Art Unit: 2878

amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are further objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 10. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Specification

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The

Application/Control Number: 10/721,648

Art Unit: 2878

abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

- 6. The abstract of the disclosure is objected to because of the language and it is not limited to a single paragraph. Correction is required. See MPEP § 608.01(b).
- 7. The disclosure is objected to because of the following informalities: the specification lacks section heading (37 CFR 1.77(c)). Appropriate correction is required.

### Claim Objections

8. Claim 1 is objected to because of the following informalities: ", and in particular infrared radiations" on lines 1-2 in claim 1 should probably be deleted. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 10. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Parrish *et al.* (US 6,028,309).

In regard to claim 1, Parrish et al. disclose (Figs. 40 and 55) a device for detecting electromagnetic radiations, and in particular infrared radiations, implementing

1011/0011(1011(1011))

a detection circuit associated with a reading circuit, the detection circuit comprising an array of detection pixels, each of said pixels comprising a thermal detector (3) of biased bolometric type, and delivering an electric current signal representative of detected radiation, said current signal undergoing a double baselining, respectively:

- (a) a global baselining carried out by means of a thermally isolated bolometer (2), ensuring extraction from said electric current signal, of a first current of constant value inherent to biasing of the thermal detector (3),
- (b) an adaptive baselining specific to each of the pixels, carried out by means of a programmable current generator (36), specific to each of the pixels, generating a current (*i.e.*, adjustable current offset; column 12, lines 23-26; column 26, lines 46-61) for subtraction from said signal, as a function of dispersion inherent to the pixel considered relative to a reference signal and stored in an associated memory (*i.e.*, ROIC data latches 43 for a particular column; column 20, lines 27-42), wherein said associated memory is integrated at a level of each of said pixels (*i.e.*, column data latches 43 in the ROIC 40; see Fig. 40 and column 20, lines 27-42).

In regard to claim **2** which is dependent on claim 1, Parrish *et al.* also disclose (column 20, lines 27-42) that a phase of reading data of each of memories associated with said pixels occurs between an end of integration of a row n+1 of the array of said pixels.

Art Unit: 2878

### Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shun Lee whose telephone number is (571) 272-2439. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Porta can be reached on (571) 272-2444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
